EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claims 7-11 have been canceled as being directed to a non-elected invention, the election having been made without traverse (see the Final rejection dated 5-27-04 for a complete discussion of the same).

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record taught or suggested that one skilled in the art at the time the invention was made would have performed a bobbin winding process with a coated monofilament dental tape comprising two or more coating materials with a coating weight of 20-120% by weight of the tape wherein one provided a decelerating winding speed tape tension control means (a decelerating bobbin which deceleration was controlled to provide for uniformity in tension of the dental tape) and a conditioning means having a controllable heating zone or surface which heated the tape to a temperature just below the softening temperature of the coating on the tape prior to winding the coated tape on the bobbin. It should be noted that the disclosure did in fact have support for reciting that the conditioning means heated the tape to a temperature just below the softening temperature of the coating on the tape (see page 19, lines 16-19 of the disclosure). The

reference to Prospero clearly required that one heat the tensioning mechanism to a temperature above the melting temperature of the wax (the coating) on the dental floss. Additionally, it is clear that the reference employed only a single coating (a wax) upon the tape. Also, there is no indication that the bobbin speed was decelerated in order to maintain tension on the tape in Prospero as the heated device itself was the device which was responsible for tensioning the dental floss and NOT a decelerating bobbin in the winding operation. The references to UK '944 and UK '342 are cited herein as having been submitted by applicant and cited in the PCT application. A copy of the 1449 with the IDS dated 2-20-02.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff H. Aftergut whose telephone number is 571-272-1212. The examiner can normally be reached on Monday-Friday 7:15-345 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine Copenheaver can be reached on 571-272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
